Burbank High School
GPA: 4.14 || Member of National Academy Foundation of Engineering

Skills

Java, Python, HTML, C++
Kibana (KQL, Lucene), Lens
Google and Microsoft Suite

Languages

English (Native)
French (C1)
Armenian (C1)
Italian (A1)

NINA ELMOYAN

Undergraduate Student Researcher

About Me

I am currently a second-year undergraduate student at Glendale Community College. My professional goals include bridging the gap between the humanities and artificial intelligence through research and projects combining spoken language with natural language processing models. After completing my two years at GCC, I aim to complete my B.A. in Linguistics and Computer Science at UCLA.

Experience

Intern: Digitalization Department of the Matenadaran Institute of Ancient Manuscripts July 2025-Present
Yerevan, Armenia
I am working on the Armenian Manuscript Catalogue Access Platform at Matenadaran where I use Java for data preparation, cleaning, and manipulation as well as Kibana for data access and visualization.

Assisted with running operations during the International Armenological Congress hosted by Matenadaran from July 8 to 11 2025, including the handling of technical gear, directing guests, and helping distribute appropriate materials to presenters.

Undergraduate Researcher: Scholars Program Research Group, Glendale Community College Sept. 2024-Present
Glendale, CA, USA
Designed and implemented a cross-regional mixed-methods study analyzing the correlation between linguistic proficiency, language usage, and cultural identity among Armenian diaspora communities, contributing to broader discussions on heritage language maintenance and diasporic belonging.

Presented findings at the UCLA Armenian Studies Colloquium (May 2025), receiving Third Place Recognition as the sole freshman among predominantly graduating undergraduate and master's-level researchers.

Supplemental Instruction Leader – French 101, 102, 103: Glendale Community College Sept. 2024-Present
Glendale, CA, USA
Develop and lead interactive sessions that enhance student comprehension of French grammar and syntax, increasing engagement and retention as measured by student feedback and test performance. Partner with faculty to create instructional materials tailored to common student challenges, improving understanding of linguistic structures.
